This Fund is managed by ReAPS Asset Management Limited, which forms part of the APS Bank group of companies.

Objectives and Investment Policy

Investment Objective

The Fund endeavours to maximise the total return to investors, minimising volatility (price fluctuations) whilst seeking to attain a desirable level of liquidity (how easy or difficult fund investments are to sell), following ethical principles according to the Fund's Ethical Policy.

Investment Policy

The Fund invests primarily in a diversified portfolio of government and corporate bonds, in direct equities (shares) and may also hold units in selected funds (Collective Investment Schemes - CISs), bank deposits (fixed term deposits) and cash. The Fund can only invest in government and corporate entities as provided by the Ethical Policy of the Fund, the most recent version of which is available on the website www.apsfunds.com.mt.

The Fund may be fully invested in government and/or corporate bonds rated investment grade by a reputable rating agency, or in the case of unrated bonds, are deemed to have an equivalent rating by the Investment Manager. The Fund may additionally invest up to 40% of its total net assets in high yield bonds, which are instruments carrying a credit rating below investment grade.

The Fund may invest in bonds both having fixed and floating coupon rates, and may also invest in inflation linked government bonds. The Fund may also invest up to 40% of its total net assets in direct equities or CISs whose main exposure is in equities.

In selecting investments, the Investment Manager is not bound by any geographical restrictions. The Fund will be actively managed according to the Investment Manager's views on the financial markets. The Investment Manager will generally aim for broad diversification across industries and issuers but the Investment Manager may, if warranted by market conditions, increase the allocation to particular industries or issuers.

The Fund will at all times maintain at least 50% of the Fund's net assets denominated in euro.

The Fund may hold ancillary liquid assets such as cash, bank deposits, stocks, short term certificates, commercial paper and treasury bills. The Investment Manager may also invest in financial derivative instruments (FDIs) for the purpose of efficient portfolio management.

Risk and Reward Profile

The Fund's rating on the risk and reward indicator is based on historical data and therefore may not be a reliable indication of the future risk profile of the Fund. It should be noted that even the lowest category on the indicator does not mean risk free.

The rating shown is not guaranteed and may change over time.

Why is the Fund in this Category?

The Fund is in category 4 (Synthetic Risk and Reward Indicator - SRRI) as some of the asset classes that it invests in such as shares and units in funds tend to be more volatile. This volatility may result in gains or losses for the Fund. The Fund's risk and reward category accordingly reflects the historical volatility of investments held by the Fund.

Additional Risks

The Fund's risk and reward category may not capture all material risks to which the Fund may be subject, such as:

Liquidity Risk – This is the risk that investments held by the Fund may become hard to value or trade without significantly impacting the market price. This may occur due to unfavourable market conditions or because assets are listed on smaller stock exchanges.

Credit Risk – This is the risk that the issuer of a bond or any other debt instrument experiences financial difficulty and subsequently defaults on its debt obligations to the Fund. Debt instruments that are subordinated or which have a lower credit rating are generally considered to have higher credit risk, and thus carry a greater possibility of default than higher rated and/or unsubordinated securities.

Use of FDIs – The Fund may use FDIs for the purpose of efficient portfolio management. FDIs also involve risks that are different from, and in certain cases, greater than, the risk presented by more traditional investments.

Further information on risks may be found in the section entitled "Risk Factors" in the Fund's Prospectus.

The "Practical Information" section below explains how you may obtain a free copy of the Prospectus and other useful information.
